# Great sound. Engineered. We make life sound better

Great sound is so much more than *just* sound. It's a way of transforming lives. That's why we make it our life's work to be the experts who deliver incredible sound. We believe that having some of the world's best sound engineers, in addition to the most advanced acoustic testing and development facilities, enables us to make solutions that are truly intelligent and beneficial.

## **Engineered for purpose**

Hundreds of hours of research and meticulous engineering go into each and every Jabra product. The result? Products that are innovatively engineered for purpose, and technology that won't get in your way but will have a huge impact in making what you do better, more efficient, and more productive. We inspire people to go further than before.

We have been enabling people go further for nearly 150 years, and Jabra is proud to be part of the GN Group – a brave and inventive group of people who have been breaking frontiers since 1869. From our home in Copenhagen, Denmark, the GN Group revolutionized communications by laying the world's first submarine cable, which carried the first telegraph line linking East to West and brought the world closer together. The spirit of the GN Group inspires us to break boundaries of our own – for example we've created the

“The spirit of the GN Group inspires us to break boundaries. We created the world's first ultra noise-cancelling microphone.”

world's first ultra noise-cancelling microphone, the world's first Bluetooth® headset, and the world's first sports headphones with integrated heart-rate monitor, to name just a few.

### **Pushing creative limits**

And we don't just share the GN Group's pioneering spirit, we share their knowledge and expertise, too. Our engineers advance technology, set new standards, and push their creative limits. And then they share what they've done within our Group. Consumer tech makes its way into professional tech, medical-grade sound solutions make their way into consumer products, and always with the same goal – to make life sound better.

Thanks to our close relationship with ReSound, our sister brand, we have unrivalled sound capabilities. ReSound are world-leading hearing-aid experts who blend design and technology to bring people with hearing loss closer to the things they love.

### **Personalized hearing experience**

These powerful, discreet, and smart hearing aids can now be controlled by integrated apps. This delivers a natural, personalized hearing experience and can transform the hearing aids into wireless stereo headphones.

Anyone can make sound, but we settle for nothing less than the world's best. Because great sound isn't just made. It's Jabra engineered.

# Unified Communications

**Our sound solutions help you get the full benefit from your UC investment through amazing sound and simple, easy to use sound devices.**

At Jabra, we focus on the individuals that make up the organization. Behind each Jabra sound device is a person who needs to adapt to new technology and embrace new ways of working.

To help them adapt to the new reality, we map the exact ways they'll use our products to create value – meaning you get the productivity you'd expect from our products.

## **What Is Unified Communications?**

UC makes it easier for people to connect, communicate and collaborate. UC brings together all office communication devices into a single, integrated application and user experience. This includes replacing traditional telephones with softphones.

With a UC solution in place, employees are more productive, interactions are smoother, and you get tangible cost reductions. This provides a very compelling business case for companies.

## Perfection in partnership

### Strategic alliances

We design, develop and test our sound solutions in close co-operation with the market's leading telecom and UC providers. We have earned the certification and endorsement of Microsoft, Cisco, Avaya, Unify, Alcatel, and many others. We work closely with them to integrate our products into the current and new generations of their UC solutions – which is why we're the market leader in UC-optimized sound devices.

# New ways of working

## Hacking Productivity in the Office: The Right Technology, Optimized

*“These days even instant gratification takes too long.”*

Carrie Fisher

We live in a fast-paced world and sometimes, from our insatiable need for speed, we miss the forest for the trees. At work we often confuse purpose and productivity. Today’s fast-as-light business climate might be vital for survival, but it often drains our finances, stifles innovation and exhausts employees.

How do we find new ways of working that accommodate today’s productivity targets but also enhance employee needs and the freedom to innovate? Finding the ‘optimal tools’ is an important part of the process. Work is no longer a place that you go to, but an activity that you engage in, regardless of place, and often regardless of time. Dispersed teams and community management are the new order of business.

These new challenges are reflected in the products Jabra takes to market. They are invented with the individual in mind, and recognize that greater productivity must be coupled with choices about the technology we use.

Our philosophy for New Ways of Working is built around the idea of organizing work with a focus on people reaching their full potential. Managers and employees alike make deliberate choices about workmodes – whether collaboration, concentration, conversation or communication – and for each, there are right tools for the job.

New Ways of Working is about surrounding ourselves with applicable technologies and processes, and a culture that helps us to achieve our full potential.

We’ve all heard the expression “Work smarter, not harder.” At Jabra, we’re dedicated to giving you the right tools to achieve this.

To learn more about new ways of working in an office environment, please visit our blog.

<https://blog.jabra.com/new-ways-of-working/>

“We shouldn’t expect office workers to perform their jobs with the wrong tools. But what are the ‘right’ tools?”

# Meeting your communication needs

## Our world of end-users, divided into three distinct use case categories

### Call centric

Our Call Centric solutions are for agents, civil servants, traders and financial advisors who listen and talk for a living over the phone with customers to raise customer satisfaction by solving their problems. Conversation is key to their work, and they increasingly need to perform in calls in noisy environments that also allows for concentration prior to calls.

- **Jabra Pro Series**
- **Jabra Biz Series**

### Task-based

Our Task-based solutions are for back office functions like marketing, R&D, supply chain, etc. whose work requires a high degree of concentration throughout the day. These solutions are also geared towards those who often need to share their knowledge with colleagues and external stakeholders through online based collaboration.

- **Jabra Evolve Series**
- **Jabra Speak Series**

### Calls-on-the-move

Our Calls-on-the-move solutions are for those who work with a high degree of mobility outside the office. They need to make calls while driving from one sales meeting to the next, or when moving from one location to another. For such professionals, hands-free calls are not an optional benefit – they're a requirement.

- **Jabra Motion Series**
- **Jabra Stealth UC**

Call centric

Solutions are for agents, civil servants, traders and financial advisors who listen and talk for a living over the phone with customers to raise customer satisfaction by solving their problems.

## Jabra Busylight - Do not disturb

The Jabra Busylight helps you manage your personal workspace in an open office or hot desk environment where interruptions and distractions are high. Let your colleagues clearly see when you are on the phone: the indicator turns red when you're on a call and helps prevent you from being disturbed.

**Compatible with: Jabra Pro 9400 Series, Motion Office, Link 850/860**

# Jabra Pro 9400 Series

## Headsets for people who can't afford to miss a call

The Jabra Pro 9400 Series wireless headset is for Knowledge Workers who cannot afford to be out of touch. Roam up to 150 meters/450 feet away and still answer calls from your desk phone, smartphone, or softphone. Touch screen display makes configuration and call management easy. All with best-in-class noise cancellation, acoustic protection, and sound quality.

- Industry first wireless office headset with user-friendly touch screen for easy call management<sup>1</sup>
- One wireless headset for your desk phone, smartphone and softphone – simultaneously
- Crystal-clear conversation even in noisy open plan offices
- Walk and talk up to 150 meters/450 feet from your desk
- Ease technology transition - connect to both desk phones and softphones with one headset

# Jabra Noise Guide

## See noise levels fall, feel productivity rise

Open-plan offices are becoming increasingly popular. However, as many as 35% of knowledge workers state that noise levels from colleagues nearby negatively impacts them. Jabra Noise Guide is a portable device that monitors noise levels and makes people more aware of the impact noise has on their work. You can use it to identify noisy areas and encourage workers to reduce office noise.

- Visual feedback of noise levels, driving positive workplace culture
- Measure underlying noise trends
- Customize sensitivity levels for specific needs
- Data is easily uploaded by a USB cable connected to a PC
- Easy to set up

To learn more about the Jabra Noise Guide go to [jabra.com/noiseguide](https://jabra.com/noiseguide)

Work environment:

At office desk

**Task-based**

When you're working at a desk, you need a comfortable, well-padded and superior call quality solution that suits your environment perfectly. This means your productivity starts from the second you sit down to work.

# Engineering, evolved.

## Jabra Evolve 75. Engineered for wireless concentration

**Great sound is so much more than just sound – it transforms the way you work. At Jabra, we evolve sound technology so that you can concentrate and work better, be more efficient and, ultimately, be more productive.**

We're no strangers to engineering ground-breaking communication solutions – through our parent company, GN, we've been pioneering such work since 1869 – and now more than ever innovative thinking is required to meet your needs. Today's open offices are often noisy, densely-populated environments. They are important for sharing knowledge and allow for effective team collaboration – but they come with challenges for those working in them.

On calls you need to concentrate, and this requires blocking out ambient noise. You also need to collaborate, and so might need to move away from your desk. And to offer great client service, you need to avoid unnecessary interruptions. (Did you know that, on average, office workers lose 24 minutes every work day due to disruptions?)

To solve this modern workplace dilemma, our engineers optimized audio performance and created advanced test equipment specifically for the Evolve 75. We put 40,000 hours into developing a headset designed to meet open office needs; developing amazing Active Noise Cancellation (ANC) to keep you in the zone, and a busylight to act as a 'Do Not Disturb' sign for your colleagues.

We started developing ANC two decades ago, and have today enhanced and improved this technology along with the digital signal processing (implemented via a two-microphone solution) now found in the Evolve 75. The necessity for high-quality, crystal-clear sound for both calls and music required expert engi-

neering in the speaker element, and for this we drew heavily on our acoustics heritage. With some of the world's best sound engineers, and the most advanced acoustic testing and development facilities, we make solutions that are intelligent and beneficial.

By integrating leading wireless technology, and designing and optimizing our antennas, we give you the freedom to take a call and reliably move around the office, when needed.

To deliver this superior wireless solution, our engineers deep dived into our experience with Bluetooth®. We produced the world's first Bluetooth® headset, and were involved in creating the Bluetooth® standard itself, and today the results are tangible for users.

Not only does the Evolve 75 have a wireless range of 100ft/30m, it also allows you to connect to

two devices at the same time, letting you receive calls or listen to music from up to two devices, simultaneously. This delivers more freedom and flexibility throughout your day.

This engineered-for-purpose thinking makes sure that the technology you work with, works for you. Our latest headset is a perfect example of how evolved engineering delivers a product that is perfectly adapted to individuals and the noisy open offices they work in.

When you use the Evolve 75, we think you'll agree that great sound isn't just made. It's engineered with the purpose of transforming the way you work.

**NEW**

# Jabra Evolve 75

The best wireless headset for concentration in the open office

**Jabra accessories**  
Get the most out of your  
Jabra audio solution

Add the accessories you need to empower your Jabra audio solution and fully meet your specific communication and collaboration requirements.

# Jabra accessories

## Amplify your audio – Audio processors

Turns the traditional desk phone headset (QD) into a full digital headset with all the advantages of improved call management and the ability to use the QD headset on both the desk phone and a UC softphone.

Jabra Link 180

Jabra Link 850

Jabra Link 860

## Leave the desk behind – Remote Call Control

Using a wireless headset together with a desk-phone becomes much more productive when you can hear and take calls away from the desk. With Jabra Remote Call Control solutions allows enables that volume can be adjusted during the call directly on the headset away from the desk phone.

Jabra GN 1000

Jabra Link 14201

## Simply seamless – USB enablers

Increase productivity by connecting the headset to a digital enabler, which increases the functionality. For example you can connect the traditional desk phone headset (QD) to a UC softphone or connect two headset to the same softphone.

### For QD headsets

Jabra Link 230

Jabra Link 260

Jabra Link 265

Jabra Link 280

Jabra 1200 Series

### For Bluetooth® headsets

Jabra Link 360

Jabra Link 370

## Familiar functionality – Handsets

Combine the traditional features of a handset with the benefits of a UC softphone solution

Jabra Handset 450

Jabra Dial 550

### Jabra Direct for Windows

A feature-rich integrated software solution for your headsets. Manage firmware and software updates to:

- Facilitate headset adoption
- Reduce the time spent on headset deployment
- Optimize the conversation experience for customers

All-in-one, user-friendly interface.

Download it free today at [jabra.com/direct](http://jabra.com/direct)

### Jabra Suite for Mac

Get your Mac softphone and Jabra sound device speaking the same language.

- Control your Mac softphone calls from your Jabra device
- Improve your Jabra device with firmware updates
- Handle Bluetooth® connections between your Mac and Jabra headset

Download it free today at [jabra.com/macsuite](http://jabra.com/macsuite)

**Jabra software**  
 Complete control. Complete solutions.  
 Install and connect your Jabra sound devices.

### Jabra Connect

The smartphone app for iOS and Android that puts your Bluetooth® customization in the palm of your hand.

- Switch seamlessly between calls on your smartphone or PC softphone
- Easy pairing of Bluetooth® devices
- Configure your headset via app
- Check your headset battery level

For Jabra headset compatibility, visit [jabra.com/connect](http://jabra.com/connect)

### Jabra Xpress™

Jabra Xpress is an online service designed for IT professionals that helps mass deploy and manage Jabra USB audio devices in record time, remotely. It has smart tools such as the new Jabra audio device dashboard – a real lifecycle management tool to populate status reports, device inventory and forecasts. Jabra Xpress ensures:

- Easy mass deployment
- Smart asset management
- Agile maintenance

To accelerate UC adoption and maximize Jabra headset ROI, download Jabra Xpress today at [jabra.com/xpress](http://jabra.com/xpress)

### UC Plug-and-Play

Intuitive call control and seamless connection to all leading UC applications and softphones. Easy to set up and easy to use. You're free from any installation expertise or extensive training requirement.

### Secure Wireless Calls

All wireless office headsets digitally encrypt the signal between the headset and the base. That's guaranteed confidentiality and peace of mind when you need your privacy.

### High Durability

Reliable and built to last. Every headset is subject to extensive testing, everything from cable flexing over boom arm rotations to acoustic tests. Durability cuts costs and saves time.

### Remote Call Control (RCC)

RCC gives you call control with your wireless headset from your desk phone, using either an Electronic Hook Switch (EHS) cable or a mechanical handset lifter (Jabra GN1000).

### Optimized for Skype for Business

The vast majority of Jabra products come in standard variants or variants that have been optimized for Microsoft.

### DECT vs. Bluetooth® Technology

DECT – Best possible range and density performance.  
Bluetooth – When mobility with one solution, in and outside of the office, is a key need.

### Audio quality

#### Clear Sound

Clear sound is important for call efficiency and accuracy, and providing superior service. Digital Signal Processing (DSP) technology optimizes sound performance by filtering out distracting background noise, reducing call handling times and potential misunderstandings.

#### HD Voice – Wideband audio

Enjoy high-definition sound with HD Voice and get crystal clear, intelligible communication. You get life-like, vibrant conversations that let you focus on the content of the call instead of struggling to hear the person on the other end of the line.

#### Noise cancellation

##### Noise Blackout™

Jabra Noise Blackout technology eliminates disturbing background noise such as wind, surrounding conversations or traffic to enhance your voice. So you can now talk freely without even raising your voice.

##### Noise Cancellation

Choose between different noise canceling microphones that filter out unwanted background noise. Great for use in noisier, open office environments.

##### Wind Noise Protection

Wind Noise Protection enables you to keep the thread of your conversation in open air environments without any interference. Walk, bike, run, work outside and talk with no need to raise your voice or shout to be heard.

# Quality as standard Jabra headset technology

## Standard features that take your communication to the next level.

Headset	Bluetooth®	DECT
Connection (in the office)	Deskphone Softphone Mobile phone	Deskphone Softphone Mobile phone
Connection (outside the office)	Softphone Mobile phone	Not possible
Range (up to)	100m/300ft	150m/450ft
Talk time (up to)	12h	10h
Standby time (up to)	360h	46h
Channels available	79	120
Density recommendations (up to)	25 units (all Bluetooth®)	80 units (all DECT)
Sound quality	Wideband, Narrowband, HiFi (A2DP)	Wideband, Narrowband

### Hearing protection

#### PeakStop™

PeakStop technology, included with all Jabra headsets, immediately removes potentially harmful loud sounds or tones before they reach your ears and keep the sound level within a safe range to protect your hearing.

#### SafeTone™

SafeTone technology, included with selected Jabra headsets, protects your hearing by cutting off sudden loud noises and maintaining a safe average sound level throughout the day – meeting EU noise at work compliance and NA recommendations.

For more information please visit [jabra.com/hearingprotection](http://jabra.com/hearingprotection)

### Comfort

#### Different wearing styles

Most Jabra headsets have a choice of up to three different wearing styles for the most comfortable and customizable fit.

#### Mono or Duo speaker

Depending on your work environment or simply your personal preference, for many of our headsets, you can choose between mono (one) and duo (two) speakers.

This brochure is intended for use as a sales tool that provides a quick overview of our headset compatibility, which can be kept to hand for your customers. Here you will find, clearly summarized, which headsets are best suited to each telephone/softphone and which requirements must be met for each type. Also explained are a selection and a recommendation of the connection options for all telephones/softphones and headsets. Your Jabra team is happy to assist you with any unlisted phones, headsets and connection options, as well as with older models. Jabra has sought in good faith to put together the information provided herein on the basis of the necessary, available and appropriate information at the time of its creation. Any reference in this catalog is of a general nature and should be verified before any purchase or other activity.
