

Sennheiser CC&O

The Sennheiser Vision:

**We shape the future of audio,
based on our heritage,
innovation culture
and passion for excellence.**

Sennheiser Communications

- Workforce of more than 2,700 people worldwide
- Annual turnover in 2014 of €635 million
- Products range from headphones, headsets, and microphones, to integrated systems
- Production sites in Germany, Ireland, and the USA
- International network of subsidiaries and distribution partners

Sennheiser's Worldwide Distribution Network

Sennheiser Communications: At a Glance

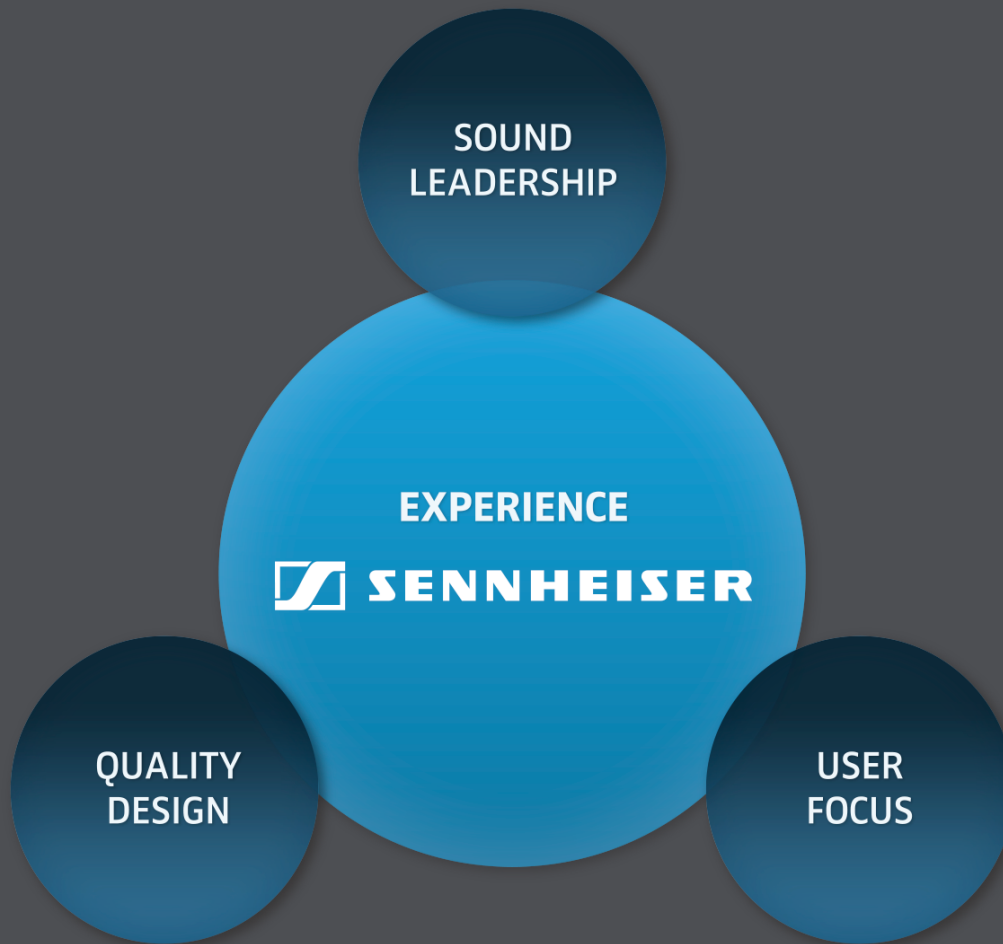

- Founded in 2003
- Sennheiser Communications has two main product areas:
 - CC&O, which includes headsets for mobile phones, contact centers, offices, and Unified Communications (UC) Professionals
 - Consumer, which includes headsets for gaming and mobile
- Headquartered in Ballerup, Denmark
- Workforce of more than 150 employees
- Sell and market through the International network of subsidiaries and distribution partners

Experience Sennheiser

The Sennheiser CC&O Value Proposition

What will you experience from Sennheiser Headsets?

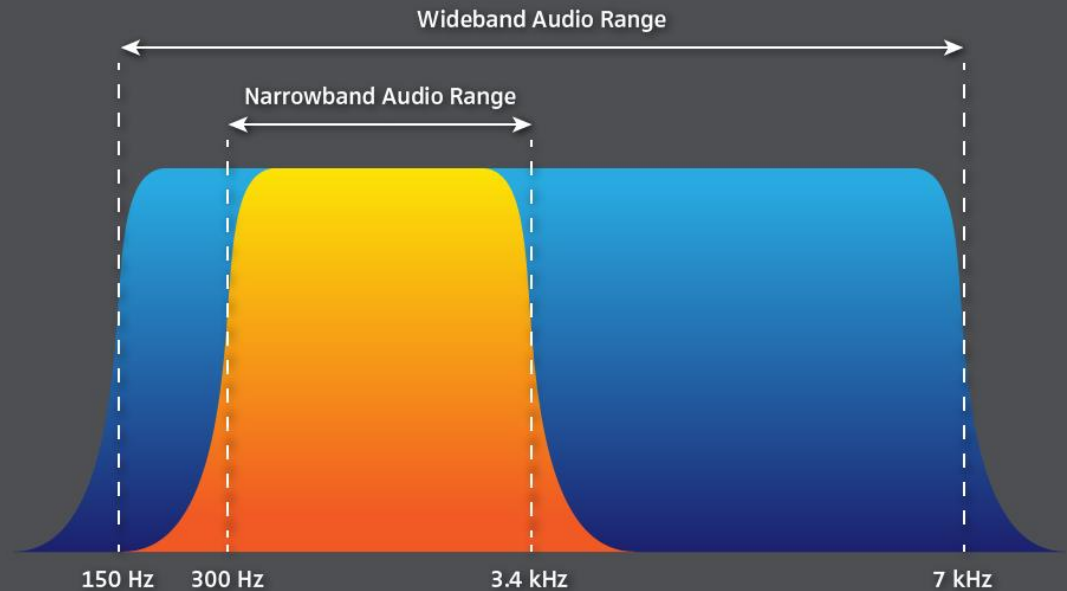

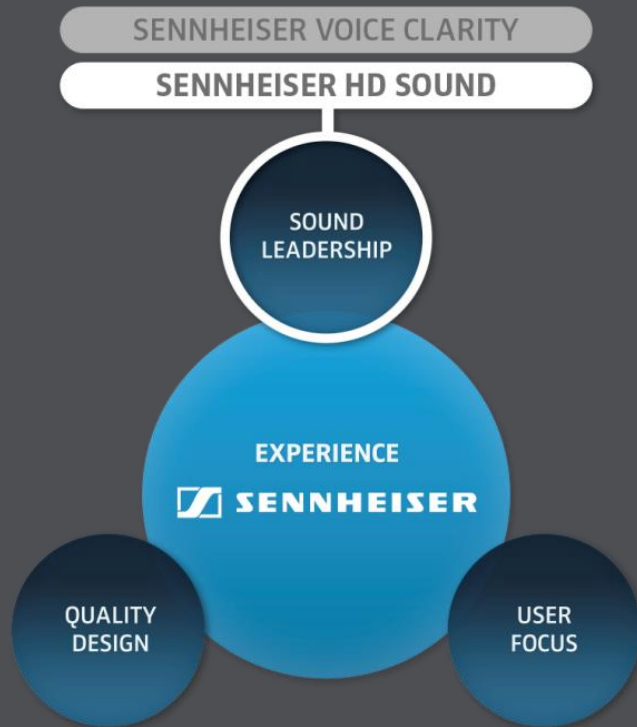

In the making of headsets for Contact Centers, Offices (CC&O) and Unified Communications professionals, we are focusing on three main areas, which outline our value proposition - these are the areas which you need to experience:

- Sound Leadership
- Quality Design
- User Focus

Sennheiser HD Sound

Leading the Wideband Evolution

Traditionally narrowband audio range resulted in an average landline sound. Today wideband audio range is generally available, and combined with Sennheiser's superior expertise in headphones and microphones, this provides Sennheiser with Sound Leadership in the CC&O headset market.

Sennheiser Voice Clarity

Superior Noise Cancellation

“If you’re continuously dealing with background noise, it’s exhausting by the end of the day. Now you just hear the call and that makes it much easier to concentrate on what’s being said”

Leo Hessing
Project Officer
Advice and Service Centre ABN AMRO

A Sennheiser CC&O headset allows you and your listener to focus fully on the conversation without being disturbed by noise from your surrounding environment.

Sennheiser Voice Clarity offers unsurpassed audio quality beyond compare.

Standard headset without voice clarity

reddot award 2014
winner

FROST & SULLIVAN

2012 BEST PRACTICES AWARD

EUROPEAN MOST INNOVATIVE COMMUNICATIONS PRODUCT OF THE YEAR AWARD

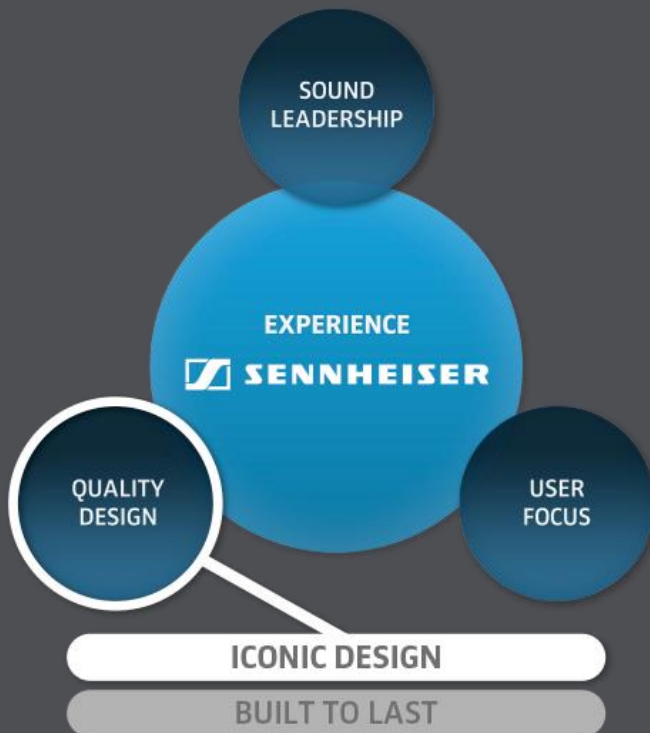

product design award

2014

GERMAN DESIGN AWARD WINNER 2016

Every headset we create is designed to be both exceptionally good for its task - and to look as good as it sounds. We're not only talking about a striking, unique appearance. For us, usability is an integral part of iconic design. Ease of use is a key requirement while creating our products.

"In selecting Sennheiser for this Award, the independent judging panel that scrutinized Frost & Sullivan's analysis was impressed by the innovative design and features, solid go-to-market strategy and, above all, strong market potential of their product"

Adrian Drozd
Frost & Sullivan Information and Communications
Technology Research Director for Europe

Built to Last

There's an unmistakable sense of quality in the design of a Sennheiser headset.

The right choice of materials is crucial to the longevity of our headsets, which are all built to last. Vectran™ reinforced cables and surgical steel hinges are just part of our armory when it comes to defending our products against everyday use

ICONIC DESIGN

Wearing Comfort

The Sennheiser headsets are designed for long use throughout a working day meaning that everything focuses on wearing comfort, from the soft ear pads to personalized fittings and wearing styles

*"The headset is the key working tool for our employees. For the selection of models: safety, voice clarity and **wearing comfort** were the most important criteria. The Sennheiser solution really convinced us on all parameters"*

Gero Niemeyer, Head of Customer Service, Deutsche Telekom, Germany

Strategic Alliances create optimal Unified Communications

- Compatibility is key in Unified Communications, which is why Sennheiser partners with major global providers of telephony and Unified Communications platforms and products.
- Together, we have developed integrated, easy-to-install solutions to deliver the ultimate UC experience in terms of sound, wearing comfort, and hearing protection.

- Noise-cancelling microphone
- Wideband headset
- 300° adjustable microphone boom
- ActiveGard® Technology
- Available single or double sided

Product Specifications

Work Place and Device Definitions

Typical desk users spend limited time away from their desk and are not required to answer calls when away from their desk.

Typical office-based users have an allocated desk although they don't spend too much of their time at their desk.

Typical field-based users have no dedicated desk in the office and no fixed location but should be available while on the road.
